

Pressed Flower Coaster

Supplies in this kit include:

- Two 4 x 4-inch glass tiles
- Dried, pressed flowers
- 18" of 1/4" copper tape
- E6000 glue
- Also - 4 rubber feet to protect table surfaces from rough edges

Instructions:

1. Make sure both sides of each piece of glass are clean and dry.
2. Arrange the flowers on top of one of the glass coasters.
3. Secure the flowers down with a small dab of E6000 glue.
4. Sandwich the flowers with another glass tile.
5. Remove the backing off of the copper tape and adhere it along the edges of the glass tiles. Try to center the copper tape as much as possible. This will help make the copper border look as clean and consistent as possible.
6. Press the excess copper tape down to create the copper border detail.
7. Run a smooth object along the copper tape to flatten any ridges that may have formed. Careful! The copper tape may be fragile.
8. Apply rubber feet to the bottom of the coaster in the four corners.
9. Post a picture of your finished coaster on our Facebook page!
